X CERTIFICATION *ENABLERS*

Welcome by EADPP Chair, Jaik Dekker

Welcome, everyone! As Chair of the European Association of Data Protection Professionals – the EADPP – I would like to sincerely thank you for joining this webinar, organized in collaboration with Privacy Enablers.

Today, we reflect on the significance of the EADPP Certification for Data Protection Professionals. This certification is a gold standard in the European privacy and data protection landscape under the GDPR.

The demand for qualified, high-caliber professionals in our field continues to grow. With this certification, we aim to uphold the highest level of privacy and accountability throughout Europe. By partnering with Privacy Enablers, we demonstrate our commitment to quality and continuity, ensuring that this certification remains a valuable resource for ongoing professional development.

We are proud of what we have achieved so far and look forward to the impact professionals like you will have in the field of data protection. Today we focus on the available study guide based on the official Body of Knowledge and Skills (BOKS). This handbook provides you with a solid foundation for certification, helping you to further expand your knowledge and skills.

Additionally, those who successfully complete the exam will receive extra benefits, including one year of free membership with the EADPP. This provides access to a network of professionals and exclusive content that supports your further professional development.

I encourage you to seize this unique opportunity and contribute to the future of data protection. Thank you for your interest and commitment to a safer, privacy-focused future!
